my Github.

***Computer Science Engineering | Software Dev | AI/ML | Cybersecurity***

Computer Science Engineering student with hands-on experience in software development, artificial intelligence, cybersecurity, and networking. Built machine learning security systems, transformer-based language models, LLM applications, and full-stack web applications. Experienced with Python, PyTorch, React, Next.js, FastAPI, Git, and network security concepts. Interested in building practical software systems and solving problems through technology.

## SKILLS

Tools & Platforms :- Git • GitHub • Docker • VS Code • VirtualBox • Linux/Kali Linux • NVIDIA CUDA
AI / Machine Learning :- PyTorch • Scikit-learn • Machine Learning • NLP • Transformers • LLMs • CUDA
Software Development :- React • Next.js • FastAPI • Tailwind CSS • REST APIs
Cybersecurity :- Web Security • Phishing Detection • Port Scanning • Security Monitoring
Networking :- TCP/IP • Routing • NAT • DNS • DHCP • Cisco Packet Tracer • Network Security

## WORK EXPERIENCE

### AI Engineer Intern

Rapha MedTech · Internship
April 2026 - May 2026 · Remote

- Applied artificial intelligence and data analysis techniques to practical healthcare technology problems.
- Worked with data-driven approaches to develop and evaluate AI-based solutions.

### AI Intern

Edunet Foundation · Internship
May 2025 - June 2025 · Remote

- Developed an AI-powered YouTube Video Summarizer using Python and natural language processing.
- Worked with Microsoft Azure and AI technologies to build an applied solution.

### Cybersecurity Intern

Pinnacle Labs · Internship
May 2025 - June 2025 · Remote

- Applied cybersecurity concepts through practical vulnerability assessment and information security exercises.
- Explored common web security vulnerabilities and techniques used during security testing.

### Cybersecurity Intern

Redynox · Internship
June 2025 - July 2025 · Remote

- Developed SQL Injection, XSS, and port scanning tools for practical security testing.
- Performed web application testing to identify vulnerabilities and potential security weaknesses.

## EDUCATION

**Bachelor of Technology — B.Tech, Computer Science and Engineering**

Focus areas: Artificial Intelligence, Machine Learning, Cybersecurity, Networking, and Software Development
Karunya Institute of Technology and Sciences
2024 — Present(2028)

## PROJECTS

AI Phishing URL Detector
Network Infrastructure & Web Hosting Lab
Prelight — LLM Inference Optimization
SQL Injection & XSS Security Scanner

## CERTIFICATES

- CCNA: Introduction to Networks (CISOC)
- CCNA: Switching, Routing, and Wireless Essentials(CISOC)
- CCNA: Enterprise Networking and Security (CISOC)
- Data Science Essentials With Python (CISOC)
- Microsoft Certified: Azure Data Fundamentals (MICROSOFT)
- Fundamentals of Remote Sensing (NASA)
- Red Hat System Administration(RED HAT)
- Python Fundamentals (EC-Council)
- Quantum Business Foundations (IBM)
- CRUD Operations in MongoDB (Mango DB)
- From Relational Model (SQL) to Document Model (Mango DB)
- Fundamentals of Accelerated Computing with CUDA Python(NVIDiA)
